

**Seals Class.**

**Spring Term 2019.**

**Miss Sharratt and Mrs Adams.**

**English.**

In English we will be writing our own sequels to the class story '*Harry Potter*'. We will also be looking at how to write a letter and diary entries, using lots of different language features we have learnt so far.

**Topic.**

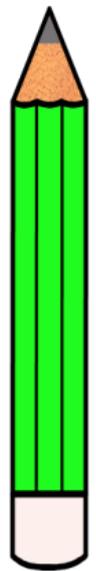

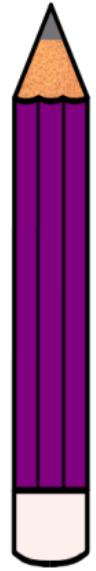

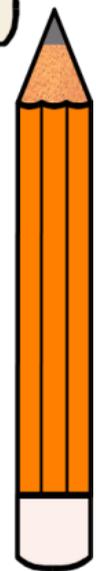

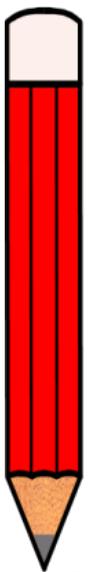

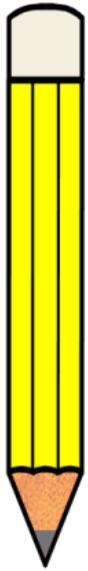

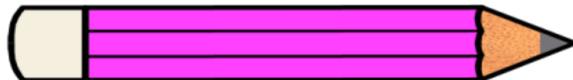

Our topic for this term is volcanoes. We will be using books and computing skills to complete our research and to make presentations to show to the class once they are finished. We will also be making our own papier-mache models in art. After half term, we will be looking at the Victorians.

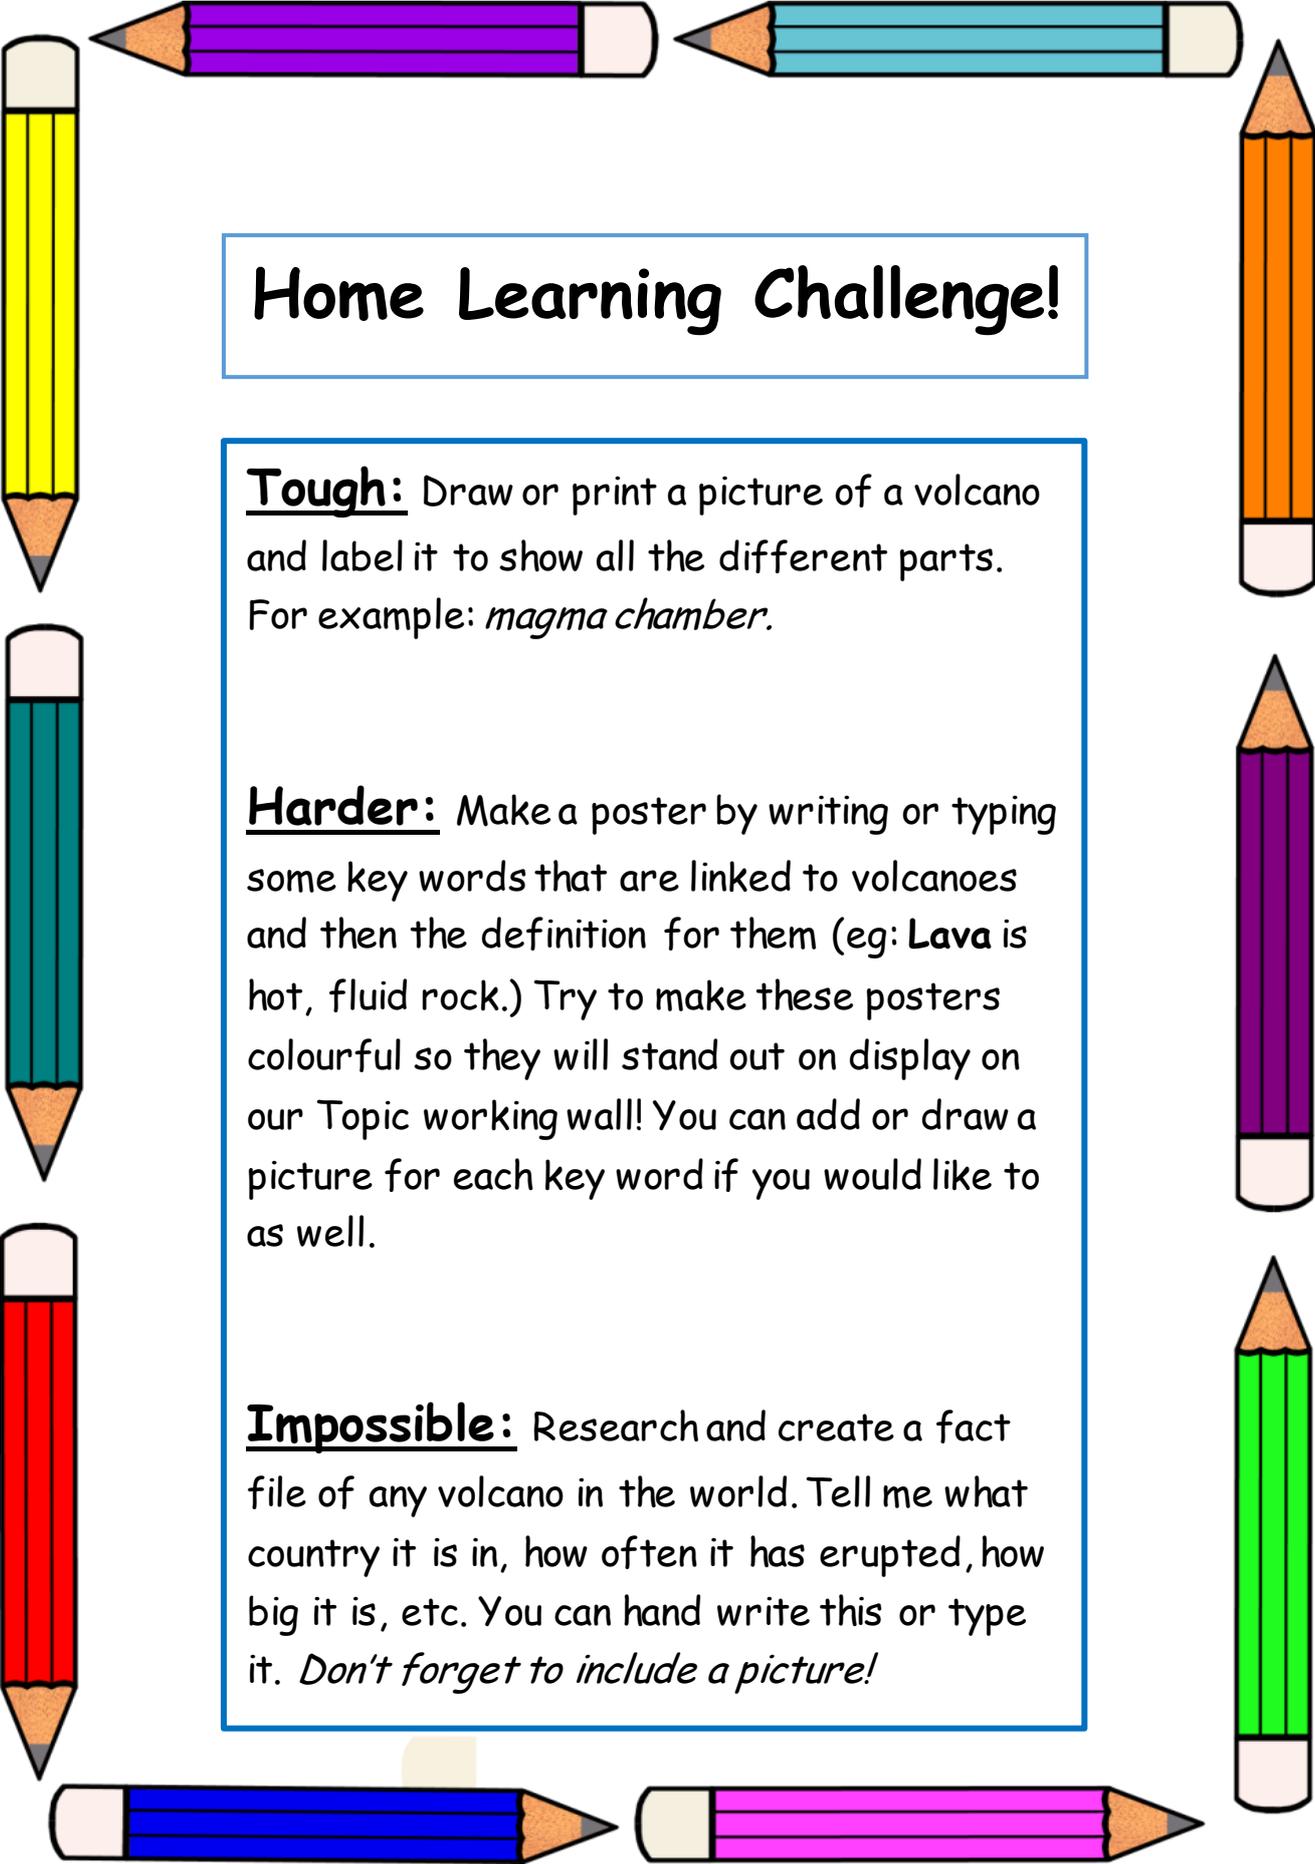

**Maths.**

In maths we are continuing to practice our times tables and using these skills in written methods for multiplication and division. We will also be learning about measures, including length, perimeter and area for year fours. In addition there will be a bit of fraction work.

**Science.**

In science we are focussing on rocks and fossils. We will be looking at different types of rocks to classify and describe them. We will also look at how fossils are formed and complete an experiment to see what conditions help to preserve and item the best.

## Home Learning Challenge!

**Tough:** Draw or print a picture of a volcano and label it to show all the different parts. For example: *magma chamber*.

**Harder:** Make a poster by writing or typing some key words that are linked to volcanoes and then the definition for them (eg: **Lava** is hot, fluid rock.) Try to make these posters colourful so they will stand out on display on our Topic working wall! You can add or draw a picture for each key word if you would like to as well.

**Impossible:** Research and create a fact file of any volcano in the world. Tell me what country it is in, how often it has erupted, how big it is, etc. You can hand write this or type it. *Don't forget to include a picture!*
