

## Seals Class.

Summer- Term 5 2019.

Miss Sharratt and Mrs Adams.

## English.

In English we will be understanding the features used in information texts and poems. With this knowledge, we will then write our own linked to our topic of rainforests.

## Topic.

Our topic for this term is rainforests! We will be using maps to locate rainforests in different countries. We will also look at the physical characteristics of rainforests and why they are important to our world.

We will be making good use of our ICT and computing skills to find out some amazing facts!

In RE we will be learning about Islam, specifically God. Whilst in PSHE, we will be looking at positive relationships.

## Maths.

In maths, times tables are at the forefront of our learning. This term we will also be working with money and looking at statistics.

## Science.

In science we are continuing to focus on shadow and light but with more of a focus on reflections and understanding how shadows are created. Additionally, we will use the data loggers to provide us with readings of the amount of light in different places.

# Home Learning Challenge!

**Tough:** Create a poster (hand written or typed) with key words, facts and pictures on rainforests.

**Harder:** Choose a specific rainforest in the world and create an information poster on it. Don't forget to include a picture, either draw and colour one or print one off!

**Impossible:** Create a model rainforest scene! Use resources in your home, such as a shoe box, toilet roll tubes, stones, sticks and paper to make trees, leaves and even creatures!
